Amendments to the Claims:

Please cancel claims 2-57.

Listing of Claims:

1. (Original) A method of refreshing dynamic data stored in an integrated circuit, the integrated circuit being adapted to receive a supply voltage and being adapted to operate in a self-refresh mode of operation to refresh the dynamic data at a refresh time that defines how often the dynamic data is refreshed during the self-refresh mode, the method comprising monitoring a magnitude of the supply voltage and adjusting the refresh time as a function of the monitored magnitude of the supply voltage.

2-57. (Cancelled)

Respectfully submitted,
